

Christina Blagojevic

Resident in Internal Medicine

Christina is currently a second-year Internal Medicine resident at the University of Toronto, who joined Dr. Bassett's research group in 2019. She obtained her undergraduate degree in Medical Sciences from Western University in 2018 and graduated from the University of Toronto's Faculty of Medicine in 2022. Christina published the first contemporary live birth prevalence estimate for 22q11.2 deletions and the first paper on high triglyceride levels in 22q11.2 deletion syndrome (22q11.2DS). Her other research interests include pulmonary function in adults with 22q11.2DS and congenital heart disease.
